# Selecting your Clothesline

## Choosing the best clothesline for the job

1. Ask yourself three basic questions:
  - How much yard space do you have?
  - How many members are there in your family?
  - How often do you do the washing?
2. Consider whether a Rotary Hoist will fit the space you have – if so, this will be the best and most efficient clothesline to use. Then, just choose from the different models available to select the best size Hills Hoist for your washing needs.
3. If there is no room to fit a Rotary then consider either a Folding Frame Clothesline or a Retracting Clothesline. Both of these alternatives will cope with a good-sized wash load and fit into tighter yard spaces.
4. If choosing a Folding Frame or Retracting clothesline most models are supplied ready for wall-to-wall mounting. However, Hills conversion kits are available to allow you to mount the clotheslines on posts into the ground.

## Select the best location in the yard

Consider the following points when choosing where to position your new clothesline:

- Do you prefer it to be in full sun, in shade or under some cover?
- Will it be in the way of playing or entertainment areas?
- Are there any trees nearby that may obstruct the clothesline?
- Is there a pathway nearby that you will want to use?
- Is it convenient for access to and from your laundry?
- Is the wall or post sufficiently strong and undamaged?
- Will it obscure a powerpoint or light switch?

Key	Model	Dimensions	Space Required
1	Rotary 8	4.0m head diameter	5.0m diameter
2	Rotary 7	3.6m head diameter	4.5m diameter
3	Rotary 6	2.9m head diameter	4.0m diameter
